TSPi Defect Recording Log Instructions – Form LOGD

Purpose	- Use this form to hold data on the defects you find and
•	correct.
General	- Keep a separate log for each program component.
	- Record each defect separately and completely.
	- If you need additional space, use another copy of the form.
Header	- Enter your name, date, team name, and instructor's name.
	- Name the part or assembly and its level.
	- Enter the cycle number.
Date	- Enter the date you found the defect.
Number	- Enter the defect number.
	- For each program component (or module), use a sequential
	number starting with 1 (or 001, etc.).
Type	- Enter the defect type from the defect type list summarized in
	the top left corner of the log form.
	- See Appendix G for the defect type standard.
	- Use your best judgment in selecting which type applies.
Inject	- Enter the phase when this defect was injected.
	- Use your best judgment.
Remove	- Enter the phase during which you fixed the defect.
	- This will generally be the phase when you found the defect.
Fix Time	- Enter the time you took to fix the defect.
	- This time can be determined by stopwatch or by judgment.
Fix Defect	- If you or someone else injected this defect while fixing
	another defect, record the number of the improperly fixed
	defect.
	- If you cannot identify the defect number, enter an X in the
	Fix Defect box.
Description	- Write a succinct description of the defect that is clear enough
	to later remind you about the error and help you to remember
	why you made it.
	- If the defect was injected in a prior cycle, give the cycle
	number and put an * by the phase injected (i.e. code* or
	design*).
